Clinical Exercise & Tennis Center

Patient: Williams, Sheila

Intake transcribed by: SKW

Kinesiologist: Hi Sheila, can you tell me a little about yourself?

Sheila: Sure! I'm 67 and retired now—I used to be the Parks and Recreation Director here in Mesa. These days, I'm really active in my community. I play pickleball about three or four times a week, and I regularly place in the top three in my age group tournaments. I also do water aerobics three mornings a week and go to a bridge club every week. I try to lift weights with my legs a couple times a week too—though I'll admit, I worry a bit that it might make me look bulky.

Kinesiologist: That's impressive. You're very active. Dr. Borg referred you to us, I think primarily because of your diagnosis of Osteoporosis. Is that what motivates you?

Sheila: Honestly, I've just been feeling like I'm "getting older," and I really want to stay ahead of things. My mom's health has declined quite a bit—she's weak, needs assistance for everything, and has had some serious falls. We're even considering assisted living for her. I don't want to end up in that situation myself, so I figured it was time to start working with someone like you.

Kinesiologist: That makes a lot of sense. How's that been for you, being her caregiver?

Sheila: It's hard. I'm the primary caregiver and I help with all her daily tasks, but I also share the responsibilities with my siblings and a home healthcare team who comes every day. It's definitely stressful, but I want to do what I can for her. I worry sometimes for our safety when I'm helping her in the bathroom or moving from her bed to the living room.

Kinesiologist: Well we can help you with safe lifting techniques and make sure you have the strength and reserve to do that work. Do you have any health issues of your own we should talk through?

Sheila: I've been pretty healthy overall. The main thing is osteoarthritis—it acts up in my hands and knees. I also had a spinal fracture at L4 back in 2021, related to osteoporosis. But Dr. Borg knows how active I've been and said he would send you information in my referral. We did a lot of fitness testing and Dr. Borg wants me to exercise more vigorously but safely and he want me resistance training. I'm not sure why I need to do more than I am doing.

Kinesiologist: I think there are things we can add to your routine to help you maintain your bone health and work more safely with your mom. Also Pickleball is a great way to stay in shape but we want to make sure you stay safe. Any family history of arthritis, osteoporosis or other serious illness?

Sheila: No diabetes or cancer in the family, thankfully. My dad died of a heart attack at 75, and my sister who's 61 has asthma. My oldest sister unfortunately had a fall and passed away at 74. That scares me for my mom and a little bit for myself. I don't want to fall and I don't want my last year of life to be like my sister's. I have two other siblings without any major health issues. We're close and they help me care for my mom.

Kinesiologist: And what's your main goal for working together?

Sheila: I want to keep my independence and stay healthy for the long haul. Longevity runs in my family, and I want to make the most of that—starting with staying strong, avoiding falls, and keeping up the lifestyle I enjoy.

Kinesiologist: Well I have reviewed your notes and testing results from Dr. Borg and I think you have done a great job educating me about yourself. I have a detailed exercise program which I would like to discuss and show to you if you think you would like to get started? We are going to build off of the great physical activities you already do and add some exercises based on your information and Dr. Borg's referral. We will keep you and Dr. Borg informed of your progress and you and I will stay in constant contact throughout your exercises.

KIN 6056: Clinical ExRx: Sheila Williams

Sheila Williams is a pleasant 67-year-old woman who is a retired parks and recreation director in Mesa, Arizona. Ms. Williams is coming to see you because she feels as though she is “getting older” and wants to avoid the conditions her mother is suffering currently. Her mother is weak, lives with Ms. Williams with assistance, has injured herself falling and may soon have to move to an assisted living facility.

Ms. Williams is concerned and stressed as the primary care giver of her mother. She helps her mother with all activities of daily living sharing those duties with other siblings and professional home health care which visits daily.

Ms. Williams herself is an avid pickleball player, and regularly places in the top 3 in her “55 and over” community tournaments. She is active in her community and attends water aerobics 3 mornings per week and plays in a bridge club weekly. She plays pickleball 3 or 4 times per week. She lifts weights with her legs 2-3xs/week in the community fitness center. She is worried lifting will make her look “bulky.”

Ms. Williams is very independent and wants to remain that way for the rest of her life. Longevity runs in her family. She is relatively free of illness with the exception of Osteoarthritis which particularly bothers her in her hands and knees. She had an osteoporotic fracture of her spine at L4 in 2021.

Ms. Williams’ doctor would like her to work with you to establish a regular exercise regimen. Many fitness tests have been performed and her doctor has released her for vigorous exercise with an emphasis on resistance training.

Ms. Williams has no family history of diabetes, or cancer. Her father had a fatal heart attack at 75 years old. Her sister is living with asthma and is 61 years old. Her oldest sister suffered an injurious fall and died at age 74. She has two other siblings with no remarkable health history.

AHA/ACSM HEALTH/FITNESS FACILITY PREPARTICIPATION SCREENING QUESTIONNAIRE

Name: Sheila Williams

Date of birth: 7/8/1958

Age: 67

Pulse: 82 bpm, Regular

Blood Pressure: 102/78_{mmHg}

Assess YOUR health status by marking all true statements	
Yes/No	Medications:
	You take prescription medications for your heart.
<i>Yes</i>	You take other prescription medications
	Symptoms:
	You experience chest discomfort with exertion
	You experience unreasonable breathlessness
	You experience dizziness, fainting, blackouts
	History:
	Heart Attack
	Heart Surgery
	Cardiac Catheterization with angioplasty/stent placement (PTCA)
	Heart Valve Disease
	Heart Failure
	Pacemaker/implantable cardiac defibrillator
	Heart Transplant
	Congenital Heart Disease
	Other notable health issues:
	You have diabetes
	You have asthma or lung disease (example: COPD)
	You have burning/cramping sensation in your lower legs walking short distances
<i>Yes</i>	You have musculoskeletal problems that limit your physical activity
<i>Yes</i>	You have concerns about the safety of exercise
	You are pregnant
	Cardiovascular Risk Factors:
	You are a man over age 45
<i>Yes</i>	You are a woman older than 55 years, have had a hysterectomy or are postmenopausal.
	You smoke or have quit smoking within the previous 6 months
	Your blood pressure is greater than 140/90 mmHg
	You do not know your blood pressure
	You take medication for your blood pressure
	Your blood cholesterol is greater than 200 mg/dl
<i>x</i>	You do not know your cholesterol level
	You have a close blood relative who had a heart attack or heart surgery before age 55 (father/brother) or 65 (mother/sister)
	You are physically inactive (i.e. your physically active on at least 3 days per week)
<i>Yes</i>	You are more than 20 pounds overweight.

PAR-Q+

The Physical Activity Readiness Questionnaire for Everyone

The health benefits of regular physical activity are clear; more people should engage in physical activity every day of the week. Participating in physical activity is very safe for MOST people. This questionnaire will tell you whether it is necessary for you to seek further advice from your doctor OR a qualified exercise professional before becoming more physically active.

GENERAL HEALTH QUESTIONS

Please read the 7 questions below carefully and answer each one honestly: check YES or NO.	YES	NO
1) Has your doctor ever said that you have a heart condition <input type="checkbox"/> OR high blood pressure <input type="checkbox"/> ?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
2) Do you feel pain in your chest at rest, during your daily activities of living, OR when you do physical activity?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
3) Do you lose balance because of dizziness OR have you lost consciousness in the last 12 months? Please answer NO if your dizziness was associated with over-breathing (including during vigorous exercise).	<input type="checkbox"/>	<input checked="" type="checkbox"/>
4) Have you ever been diagnosed with another chronic medical condition (other than heart disease or high blood pressure)? PLEASE LIST CONDITION(S) HERE: Osteoporosis	<input checked="" type="checkbox"/>	<input type="checkbox"/>
5) Are you currently taking prescribed medications for a chronic medical condition? PLEASE LIST CONDITION(S) AND MEDICATIONS HERE: Fosamax, Calcium, Vit D3, Ibuprofen	<input checked="" type="checkbox"/>	<input type="checkbox"/>
6) Do you currently have (or have had within the past 12 months) a bone, joint, or soft tissue (muscle, ligament, or tendon) problem that could be made worse by becoming more physically active? Please answer NO if you had a problem in the past but it does not limit your current ability to be physically active. PLEASE LIST CONDITION(S) HERE: Spine Fracture 2021	<input checked="" type="checkbox"/>	<input type="checkbox"/>
7) Has your doctor ever said that you should only do medically supervised physical activity?	<input checked="" type="checkbox"/>	<input type="checkbox"/>

If you answered NO to all of the questions above, you are cleared for physical activity. Please sign the PARTICIPANT DECLARATION. You do not need to complete Pages 2 and 3.

- Start becoming much more physically active – start slowly and build up gradually.
- Follow Global Physical Activity Guidelines for your age (<https://www.who.int/publications/i/item/9789240015128>).
- You may take part in a health and fitness appraisal.
- If you are over the age of 45 yr and NOT accustomed to regular vigorous to maximal effort exercise, consult a qualified exercise professional before engaging in this intensity of exercise.
- If you have any further questions, contact a qualified exercise professional.

PARTICIPANT DECLARATION

If you are less than the legal age required for consent or require the assent of a care provider, your parent, guardian or care provider must also sign this form.

I, the undersigned, have read, understood to my full satisfaction and completed this questionnaire. I acknowledge that this physical activity clearance is valid for a maximum of 12 months from the date it is completed and becomes invalid if my condition changes. I also acknowledge that the community/fitness center may retain a copy of this form for its records. In these instances, it will maintain the confidentiality of the same, complying with applicable law.

NAME Sheila Williams DATE 7/8/2025

SIGNATURE [Signature] WITNESS Venessa Williams

SIGNATURE OF PARENT/GUARDIAN/CARE PROVIDER [Signature]

If you answered YES to one or more of the questions above, COMPLETE PAGES 2 AND 3.

Delay becoming more active if:

- You are currently experiencing a temporary illness, such as a cold or fever. It is best to wait until you feel better.
- You are pregnant. In this case, talk with your health care practitioner, physician, qualified exercise professional, and/or complete the ePARmed-X+ at www.eparmedx.com before becoming more physically active.
- Your health changes. Answer the questions on Pages 2 and 3 of this document and/or talk to your health care practitioner, physician, or qualified exercise professional before proceeding with any physical activity program.

PAR-Q+

FOLLOW-UP QUESTIONS ABOUT YOUR MEDICAL CONDITION(S)

1. Do you have Arthritis, Osteoporosis, or Back Problems?

If the above condition(s) is/are present, answer questions 1a-1c

If **NO** go to question 2

- 1a. Do you have difficulty controlling your condition with medications or other physician-prescribed therapies? (Answer **NO** if you are not currently taking medications or other treatments) YES NO
- 1b. Do you have joint problems causing pain, a recent fracture or fracture caused by osteoporosis or cancer, displaced vertebra (e.g., spondylolisthesis), and/or spondylolysis/pars defect (a crack in the bony ring on the back of the spinal column)? YES NO
- 1c. Have you had steroid injections or taken steroid tablets regularly for more than 3 months? YES NO

2. Do you currently have Cancer of any kind?

If the above condition(s) is/are present, answer questions 2a-2b

If **NO** go to question 3

- 2a. Does your cancer diagnosis include any of the following types: lung/bronchogenic, multiple myeloma (cancer of plasma cells), head, and/or neck? YES NO
- 2b. Are you currently receiving cancer therapy (such as chemotherapy or radiotherapy)? YES NO

3. Do you have a Heart or Cardiovascular Condition? This includes Coronary Artery Disease, Heart Failure, Diagnosed Abnormality of Heart Rhythm

If the above condition(s) is/are present, answer questions 3a-3d

If **NO** go to question 4

- 3a. Do you have difficulty controlling your condition with medications or other physician-prescribed therapies? (Answer **NO** if you are not currently taking medications or other treatments) YES NO
- 3b. Do you have an irregular heart beat that requires medical management? (e.g., atrial fibrillation, premature ventricular contraction) YES NO
- 3c. Do you have chronic heart failure? YES NO
- 3d. Do you have diagnosed coronary artery (cardiovascular) disease and have not participated in regular physical activity in the last 2 months? YES NO

4. Do you currently have High Blood Pressure?

If the above condition(s) is/are present, answer questions 4a-4b

If **NO** go to question 5

- 4a. Do you have difficulty controlling your condition with medications or other physician-prescribed therapies? (Answer **NO** if you are not currently taking medications or other treatments) YES NO
- 4b. Do you have a resting blood pressure equal to or greater than 160/90 mmHg with or without medication? (Answer **YES** if you do not know your resting blood pressure) YES NO

5. Do you have any Metabolic Conditions? This includes Type 1 Diabetes, Type 2 Diabetes, Pre-Diabetes

If the above condition(s) is/are present, answer questions 5a-5e

If **NO** go to question 6

- 5a. Do you often have difficulty controlling your blood sugar levels with foods, medications, or other physician-prescribed therapies? YES NO
- 5b. Do you often suffer from signs and symptoms of low blood sugar (hypoglycemia) following exercise and/or during activities of daily living? Signs of hypoglycemia may include shakiness, nervousness, unusual irritability, abnormal sweating, dizziness or light-headedness, mental confusion, difficulty speaking, weakness, or sleepiness. YES NO
- 5c. Do you have any signs or symptoms of diabetes complications such as heart or vascular disease and/or complications affecting your eyes, kidneys, **OR** the sensation in your toes and feet? YES NO
- 5d. Do you have other metabolic conditions (such as current pregnancy-related diabetes, chronic kidney disease, or liver problems)? YES NO
- 5e. Are you planning to engage in what for you is unusually high (or vigorous) intensity exercise in the near future? YES NO

PAR-Q+

6. Do you have any Mental Health Problems or Learning Difficulties? This includes Alzheimer's, Dementia, Depression, Anxiety Disorder, Eating Disorder, Psychotic Disorder, Intellectual Disability, Down Syndrome

If the above condition(s) is/are present, answer questions 6a-6b

If **NO** go to question 7

6a. Do you have difficulty controlling your condition with medications or other physician-prescribed therapies? (Answer **NO** if you are not currently taking medications or other treatments) YES NO

6b. Do you have Down Syndrome **AND** back problems affecting nerves or muscles? YES NO

7. Do you have a Respiratory Disease? This includes Chronic Obstructive Pulmonary Disease, Asthma, Pulmonary High Blood Pressure

If the above condition(s) is/are present, answer questions 7a-7d

If **NO** go to question 8

7a. Do you have difficulty controlling your condition with medications or other physician-prescribed therapies? (Answer **NO** if you are not currently taking medications or other treatments) YES NO

7b. Has your doctor ever said your blood oxygen level is low at rest or during exercise and/or that you require supplemental oxygen therapy? YES NO

7c. If asthmatic, do you currently have symptoms of chest tightness, wheezing, laboured breathing, consistent cough (more than 2 days/week), or have you used your rescue medication more than twice in the last week? YES NO

7d. Has your doctor ever said you have high blood pressure in the blood vessels of your lungs? YES NO

8. Do you have a Spinal Cord Injury? This includes Tetraplegia and Paraplegia

If the above condition(s) is/are present, answer questions 8a-8c

If **NO** go to question 9

8a. Do you have difficulty controlling your condition with medications or other physician-prescribed therapies? (Answer **NO** if you are not currently taking medications or other treatments) YES NO

8b. Do you commonly exhibit low resting blood pressure significant enough to cause dizziness, light-headedness, and/or fainting? YES NO

8c. Has your physician indicated that you exhibit sudden bouts of high blood pressure (known as Autonomic Dysreflexia)? YES NO

9. Have you had a Stroke? This includes Transient Ischemic Attack (TIA) or Cerebrovascular Event

If the above condition(s) is/are present, answer questions 9a-9c

If **NO** go to question 10

9a. Do you have difficulty controlling your condition with medications or other physician-prescribed therapies? (Answer **NO** if you are not currently taking medications or other treatments) YES NO

9b. Do you have any impairment in walking or mobility? YES NO

9c. Have you experienced a stroke or impairment in nerves or muscles in the past 6 months? YES NO

10. Do you have any other medical condition not listed above or do you have two or more medical conditions?

If you have other medical conditions, answer questions 10a-10c

If **NO** read the Page 4 recommendations

10a. Have you experienced a blackout, fainted, or lost consciousness as a result of a head injury within the last 12 months **OR** have you had a diagnosed concussion within the last 12 months? YES NO

10b. Do you have a medical condition that is not listed (such as epilepsy, neurological conditions, kidney problems)? YES NO

10c. Do you currently live with two or more medical conditions? YES NO

**PLEASE LIST YOUR MEDICAL CONDITION(S)
AND ANY RELATED MEDICATIONS HERE:**

GO to Page 4 for recommendations about your current medical condition(s) and sign the PARTICIPANT DECLARATION.

PAR-Q+

 **If you answered NO to all of the FOLLOW-UP questions (pgs. 2-3) about your medical condition, you are ready to become more physically active - sign the PARTICIPANT DECLARATION below:**

-  It is advised that you consult a qualified exercise professional to help you develop a safe and effective physical activity plan to meet your health needs.
-  You are encouraged to start slowly and build up gradually - 20 to 60 minutes of low to moderate intensity exercise, 3-5 days per week including aerobic and muscle strengthening exercises.
-  As you progress, you should aim to accumulate 150 minutes or more of moderate intensity physical activity per week.
-  If you are over the age of 45 yr and **NOT** accustomed to regular vigorous to maximal effort exercise, consult a qualified exercise professional before engaging in this intensity of exercise.

 **If you answered YES to one or more of the follow-up questions about your medical condition:**

You should seek further information before becoming more physically active or engaging in a fitness appraisal. You should complete the specially designed online screening and exercise recommendations program - the **ePARmed-X+** at www.eparmedx.com and/or visit a qualified exercise professional to work through the ePARmed-X+ and for further information.

 **Delay becoming more active if:**

-  You are currently experiencing a temporary illness, such as a cold or fever. It is best to wait until you feel better.
-  You are pregnant. In this case, talk to your health care practitioner, physician, qualified exercise professional, and/or complete the ePARmed-X+ at www.eparmedx.com before becoming more physically active.
-  Your health changes. Talk to your health care practitioner, physician, or qualified exercise professional before continuing with any physical activity program.

-  You are encouraged to photocopy the PAR-Q+. You must use the entire questionnaire and NO changes are permitted.
-  The authors, the PAR-Q+ Collaboration, partner organizations, and their agents assume no liability for persons who undertake physical activity and/or make use of the PAR-Q+ or ePARmed-X+. If in doubt after completing the questionnaire, consult your doctor prior to physical activity.

PARTICIPANT DECLARATION

-  All persons who have completed the PAR-Q+ please read and sign the declaration below.
-  If you are less than the legal age required for consent or require the assent of a care provider, your parent, guardian or care provider must also sign this form.

I, the undersigned, have read, understood to my full satisfaction and completed this questionnaire. I acknowledge that this physical activity clearance is valid for a maximum of 12 months from the date it is completed and becomes invalid if my condition changes. I also acknowledge that the community/fitness center may retain a copy of this form for records. In these instances, it will maintain the confidentiality of the same, complying with applicable law.
